Here are a few responses back in the comment section. We should talk about the language on wanting to define the scope of the riparian rule as trying to meet the PCW standard and only applying it to where there are salmon, steelhead and bulltrout. This covers fewer river miles than ODEQ staff had envisioned.

Pre-Decisional/Deliberative/Not for Public Disclosure

I need to have a discussion with you about the attached. I just talked with Dennis and the attached reflects feedback/input he and Will got from Whitman. We need to let Dennis and Will know whether there are any non-starters or fatal flaws. Can we meet before our larger group call for half an hour tomorrow, Thursday, 1/22? This is again one of those quick turnaround things.

Thanks,

Christine Psyk, Associate Director
EPA Region 10, OWW

Subject: CZARA Discussion

Richard and Dick:

Attached is a first cut at an exchange on what it would take to address current issues regarding the Oregon CZARA program with respect to forest practices. This is only a draft for discussion purposes and we look forward to continued discussion. I believe we have a call set up for early next week to follow up but Will and I would welcome your feedback in advance of that if you can share it.
